

# Standard CONVEYOR U

## 180° Product Orientation

The Standard Conveyor U is designed to transport trays or products while changing their travel direction by 180 degrees. This ensures precise orientation for seamless integration into downstream processes and efficient production line flow.

## Reliable Conveyor Technology

The Standard Conveyor U features a 300 mm wide modular flat belt driven by a drum motor for stable and dependable operation. Electrical control with a frequency converter is included in a stainless steel cabinet. Optional flights and adjustable guides can be added to maintain accurate tray positioning.

## Compact & Hygienic Design

Built entirely in stainless steel with an open construction, the Standard Conveyor U is designed for harsh production environments and easy industrial cleaning. Its small footprint allows straightforward integration into existing lines, and it can be produced in any length required by the customer.
