

LeanOne TOOL BUFFER

Lightweight, Smart, & Fast

This tool is designed for use with the LeanOne Buffer Air. The LeanOne Tool Buffer is a pneumatic light-weight tray denester with a weight of approximately 10 kilos. This makes it easier to handle and quicker to change. Therefore, it is ideal for production lines with frequent tray changeovers.

Optimized for Versatility

With its ability to denest tightly packed or fragile trays, up to 120 trays per minute, the LeanOne Tool Buffer is built for flexibility. Although the tool is custom-made for a specific tray size, it can still handle variations in material and depth. Moreover, the tool is suitable for both short- and long-side leading, making it multifunctional and adaptable.

Efficient by Design

A one-minute tool change enables fast production switches, while its compact, hygienic design supports easy integration and simple cleaning.

The LeanOne Tool Buffer boosts output and reduces refilling interruptions.
