

Smart TOOL

Patented System

The Smart Tool is a patented tool with a denesting capacity of up to 200 trays per minute, where it efficiently denests and transports trays from the stack onto the conveyor. The Smart Tool ensures precise, high-speed performance in demanding production lines.

Easy Tray Change

The Smart Tool is custom-made, thus ensuring perfect denesting of every specific tray. The Smart Tool can be removed in less than 30 seconds, and a new Smart Tool can be placed in the same amount of time. So, the production stop to restart takes no more than one minute, keeping the downtime to a limit.

Hygienic & Practical Design

The Smart Tool weighs only 12 kg/26 lbs, and its patented open construction allows for thorough cleaning of all parts.

Built for real production conditions, the Smart Tool combines hygiene, speed, and ergonomic handling, which makes it the core of any efficient denesting setup.
